

Climate Action Tracker

GREENING
STEYNING · BRAMBER · BEEDING

We're doing loads - but how do you measure its actual impact?

Climate Action Tracker

What changes did you make last year?

What changes did you & your household make in calendar year 2021 that will have affected your carbon and ecological footprint?

Choose 'Did this previously/not applicable' if you had already taken this step prior to 2021, or if the question isn't relevant to you (e.g. if you don't own your property so can't easily install solar panels).

| | No | Yes | Did this previously/not applicable |
|---|-----------------------|-----------------------|------------------------------------|
| Took simple energy saving steps at home (e.g. turning down thermostat, fitting LED bulbs) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Took steps to improve my home insulation | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Put solar panels on my roof (PV or thermal) | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Installed a heat pump | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

Looking back at 2021

Looking forward to 2022

Preliminary results based on 40 responses

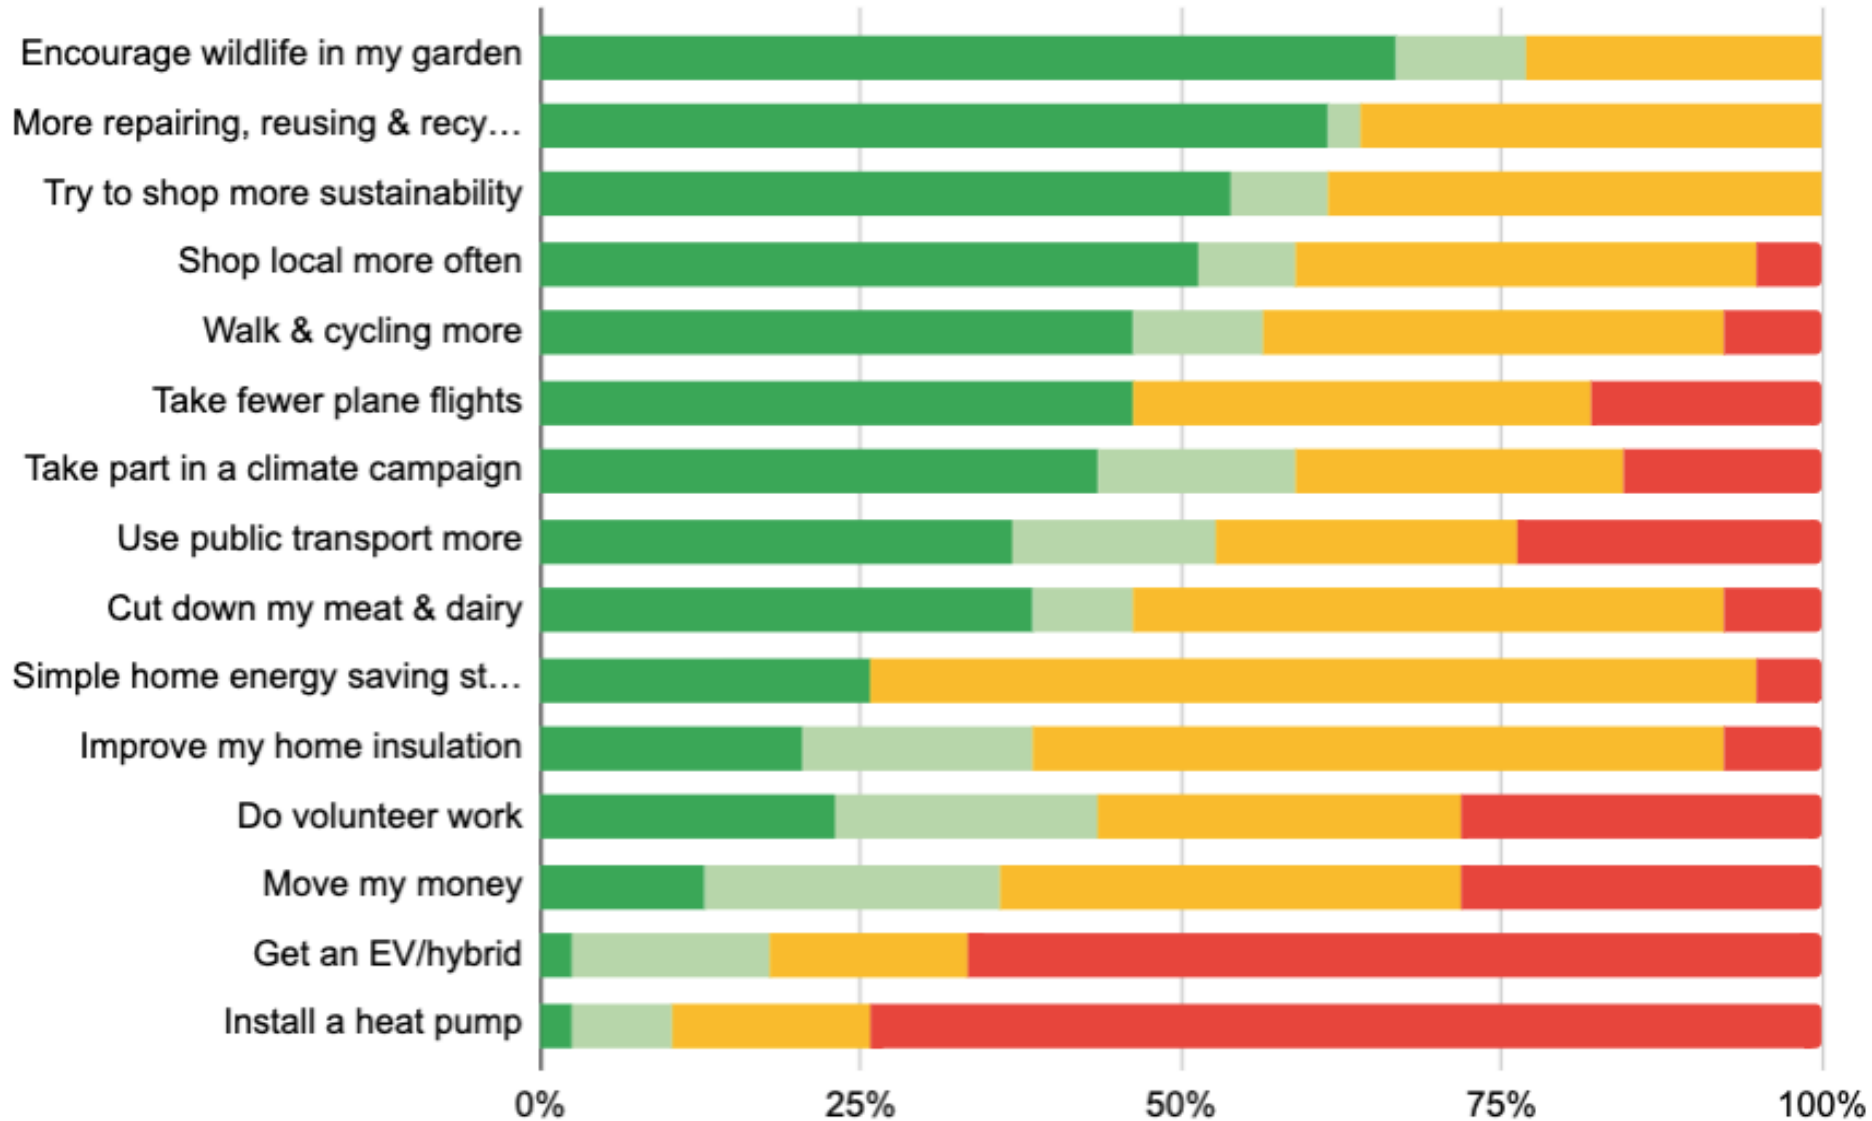

What steps did you take in 2021?

Yes Did this previously/not applicable No

What steps do you plan in 2022?

Yes Maybe Did previously or n/a No

Strengths and weaknesses

Weaknesses

- Self-selecting audience
- Not 'scientific'
- Room for ambiguity with some questions

Strengths

- Results still useful
- A solid indicator of what's changing
- Can be repeated
- A good news story
- Filling it in should help nudge people
- Helps with funders
