

Why Refill?

Transport the 'new' recycled bottle to the shops

To drill oil for making the plastic bottle

To power the factory to manufacture the bottle into 'new' recycled bottle

To power the factory & manufacture the bottle

Fossil fuel is used to make AND recycle plastic bottles.
It is used to...

Recycled bottle is transported to recycling factory in Poland, China etc

Bottle gets recycled

To transport the bottle to the shops

OR REFILL...

Keep using the same bottle and only pay for the liquid.
Better for the planet and cheaper too!
